

## SAFE-T® QC MECHANICAL ROTARY STEERING SYSTEM:

Traditional Teleflex Marine mechanical steering is still the choice for sterndrives, inboards and other power assisted applications.

It's just right for power steered boats in which No FeedBack™ systems are not required.

Safe-T® QC offers the quick response of three-turn steering, and easy installation with a patented, no-tools-required cable connection at the helm.

## APPLICATIONS:

Virtually all power-assisted sterndrive boats with wheels up to 16" diameter. Safe-T QC® replaces all Teleflex Safe-T helms made since 1968 with little or no dash modifications. (Requires use of SSC62 QC or SSC61 QC II steering cable.)

For single station use only. Safe-T QC accepts wheels up to 16" diameter.

Components are available for dual cable systems, but we recommend No-FeedBack steering for all dual cable steered, non-power-assisted outboards and sterndrives. See the NFB 4.2 Dual Cable and SeaStar PRO sections of this catalog.

## FEATURES:

- Quick-response of 3 turns lock-to-lock.
- Kits include: cable, helm, 90° bezel and hardware.
- Standard 3/4" round tapered steering shaft.
- Stainless steel cable output ends.
- Fast, easy installation: uses simple snap-in cable connection, Teleflex Quick Connect (QC) cable, and industry-standard Safe-T mounting hardware.
- Meets A.B.Y.C. standards.
- Meets N.M.M.A. certification requirements.

**DISCLAIMER:** This system is only recommended as replacement for the original system as installed by the boat manufacturer. Teleflex always recommends NFB helms for outboard applications. NFB helms lock out steering loads caused by propeller torque eliminating the driver fatigue normally experienced with a standard helm. Patented Teleflex steering helms are a drop in replacement for Safe-T systems.
